1979

Founded by Michael Rice, Flow Control Ltd invented the tap flow restrictor, later adopted across MOD, NHS, and Government Estates to reduce water waste

FLOW CONTROL
Water Conservation Ltd

1985

Introduced automatic urinal flush controls and patented the world's first retrofit push-tap conversion, strengthening its reputation across government and commercial estates, including installations at Buckingham Palace.

PATENT

1990

Expanded into water utility leak detection in response to national water shortages, growing to become the UK's largest leak detection contractor with around 450 staff.

450

flow Control
Water Management

2000

Expanded into technical services for hospitality and beverage dispense sectors, while advancing water efficiency through digital data logging, pressure management, and leak detection.

2004

RPS Group acquired Flow Control Water Conservation Ltd, while the management team led by Michael Rice spun out and rebranded as Aqualogic (WC) Ltd to continue water-efficiency operations independently.
